The Paediatric Surgery Division is a section of the Department of Paediatric Sciences of the University Hospital S. Orsola-Malpighi. The Hospital was founded in 1592; during the course of time the University has widened and increased its activities, so that at present it is one of the most accredited institutions in Italy. In 1999 it obtained the recognition of the Certificate of Quality ISO 9001-2. Policlinico S. Orsola-Malpighi is easily accessible by all means of transport:

BY PLANE  “Guglielmo Marconi” Airport is located 15 minutes from the Hospital by car.
From the airport to downtown “AEROBUS” every 30 minutes

BY TRAIN  Easy connection with the most important cities in Italy

BY CAR  Bologna is a major intersection for the Italian extensive road network.
The highway close to the Hospital access is “San Vitale, N° 11 bis”

BY TAXI  Taxi service is also available

Lessons of Paediatric Surgery:
A textbook about the main surgical Paediatric pathologies, with two explanatory CR-ROMs enclosed
€ 26,00

Basic of paediatric minimal invasive techniques
(DVD enclosed)
€ 50,00

CD-ROMs with pictures and video-clips format (mpeg1/mpeg2/avi) of all surgical procedures performed during the course
€ 25,00

Available

MINIMALLY INVASIVE PAEDIATRIC SURGERY COURSES

Inguinal and Gynaecological Laparoscopic Surgery

Bologna - Italy     June 12-13, 2006

Under the patronage of Italian Society of Paediatric Videosurgery
Under the patronage of Italian Society of Paediatric Surgery

Department of Paediatric Surgery
Post-Graduate School of Paediatric Surgery
Chair: Prof. Mario Lima
Bologna University
S. Orsola-Malpighi Hospital

Scientific Programme
E.C.M. Accreditation
Inguinal and Gynaecological Laparoscopic Surgery

**Course Description**

- Bilateral inguinal hernias or a recurrence of groin hernia after a first surgical correction can be managed very well by laparoscopy. Laparoscopy permits to detect and to close in a simply way direct or indirect hernias, and to check the contralateral inguinal ring in case of suspect of bilaterality. In expert hands the surgical time is almost the same of the traditional operation.

- Adnexial pathologies gain a great advantage from the laparoscopic approach. Ovarian cysts or torsion, intersexes that need a gonadal biopsy or removal, or the drawing of an ovarian specimen to preserve it from radiotherapy can be done safely by laparoscopic way.

- During the course these techniques will be described and discussed by the most important laparoscopic surgeons.

**Aims**

- To show and discuss the utility of laparoscopy and the applications to the organs involved.
- To make participants familiar with the anatomy of the region from the laparoscopic point of view.
- To show tricks and discuss pitfalls.

During the course it will be possible to watch surgical laparoscopic procedures in the operating theatre or live in a multimedia room where a projector is connected with the theatre and the laparoscopic camera. Participants will have the chance to talk with the surgeons during the procedure asking questions and discussing in real time. Furthermore, in the afternoon a more exhaustive discussion with all the teachers is foreseen.

**Miscellany:** Brief experiences and particular clinical cases will be presented and discussed by teachers and participants.

---

**Courses 2006**

- Liver and Oesophageal Junction Laparoscopic Surgery - February, 6-7
- Colorectal Laparoscopic Surgery - April, 3-4
- Inguinal and Gynaecological Laparoscopic Surgery - June, 12-13
- Thoracoscopic Surgery - July, 10-11
- Laparoscopic and Retroperitoneoscopic Surgery in Urology - October, 16-17
- Nursing Day in Laparoscopic Surgery - December 4

---

**Scientific Programme**

**Monday, June 12**

Chairmen: V. Jasonni, G. Amici

- 09.00 Material withdrawal and general instructions (M. Lima)
- 09.15 Anaesthesia and post-operative care (A. Gentili, A. Pigna)
- 09.45 Paediatric gynaecology laparoscopy set-up (G. Ruggeri)
- 10.00 Pelvic masses (M. Lima - A. Papparella)
- 10.30 Intersex (G. Ruggeri)
- 11.00 Coffee Break
- 11.15 Ovarian masses (C. Esposito)
- 12.15 Miscellany
- 13.15 Lunch
- 15.00 Simulator

**Tuesday, June 13**

Chairmen: V. Jasonni, G. Amici

- 09.00 Oophoropexy - Gonadal biopsy for cryoconservation (M. Dòmini)
- 09.30 Uterovaginal malformations (M. Lima)
- 10.00 Inguinal hernia (M. Dòmini)
- 11.00 Coffee Break
- 11.15 Inguinal hernia (C. Esposito)
- 12.15 Miscellany
- 13.15 Lunch
- 15.00 Simulator
