### OTHER IMPACT

- Over 150 publications have been accompanied by editorials in the same journal issue as they were published.
- Many publications have been covered by press releases by Reuters or Associated Press. Comments and coverage on my work have appeared repeatedly in Science, Nature, New Scientist, Scientist, Science AAAS News, Scientific American, Chronicle of Higher Education, general journals (e.g. Economist, New Yorker, Forbes, Newsweek, Wall Street Journal, Wired, Technology Review), CNN.com, and thousands of international newspapers and news media around the world. I have given interviews for my work on the National Public Radio, and national radio/TV channels in Australia (Australian Broadcasting Corporation), Canada, Switzerland, Austria, Germany, Denmark, Italy, Spain, and Greece among others. I was selected as the Brave Thinker scientist for 2010 by The Atlantic (see article by David H. Freedman in November 2010 issue). Several bestseller books include interviews that I have given to different authors about issues of scientific methods and bias. The 2005 paper on “Why most published research findings are false” is the most frequently accessed/downloaded article in the history of the Public Library of Science and in the open-access peer-reviewed journal literature in general with approximately 2.5 million hits to-date.

### OTHER INTERESTS:

History, classical music, painting, visiting remote islands of the Mediterranean, hiking (e.g. in the magnificent, noble mountains surrounding Ioannina), sports (swimming, basketball, and epee fencing), walking across the beautiful Stanford campus to meet people who know far more than I do, finding out errors and mistakes I have made (there is no end to them), spending time with my wife and my daughter.
